

Summer in Kappl: Sunny Mountain Adventure Park and flow trail

In summer, Kappl is an ideal destination for families and outdoor enthusiasts who want to enjoy the Tyrolean mountains. With the Sunny Mountain Adventure Park, Kappl offers a varied adventure for the whole family, while the Kappl-Dias flow trail provides mountain bike enthusiasts with an exciting riding experience. This combination of nature, fun and sporting challenges makes Kappl an attractive place for young and old.

Sunny Mountain Adventure Park: nature and fun for the whole family

The Sunny Mountain Adventure Park at an altitude of 1,830 metres offers families a wide range of leisure activities in the middle of the Verwall mountains. The adventure park is ideal for children, who can playfully explore nature and have lots of fun at the same time. A centrepiece of the park is the Sunny Mountain See, an artificial reservoir whose shore serves as a rest area and playground.

Another highlight is the large adventure playground, which is equipped with various climbing frames, swings and slides. This play area allows children to let off steam and improve their motor skills through play. For even more adventure, there is a low ropes course in the park that requires balance and dexterity from the children. In the natural environment, the little ones can move around safely.

The themed circular trail leads through the entire adventure park and offers numerous interactive stations that familiarise children with the flora and fauna of the Alps. Another highlight is the Flaxi village, where the mountain gnome Flaxi takes the children on a journey through nature. Here the little ones playfully learn more about the region while exploring the children's play pond by the Silbersee lake.

For animal-loving children, there is a small petting zoo in the adventure park where they can experience animals such as goats and sheep up close. This not only provides entertainment, but also the opportunity to learn about the animals and enjoy interacting with them.

The adventure park is not only a place to play, but also to rest and relax. After a hike, families can refresh their feet in the cool water at the Kneipp facility and recharge their batteries for the rest of the day.

The offer is rounded off by a fishing pond where families can fish for a fee and prepare their catch directly at the barbecue stations - an experience that combines nature and culinary delights.

Kappl-Dias flow trail: mountain biking in Kappl

The 3.6-kilometre long Kappl-Dias flow trail starts between the Sunny Mountain Park and the Diasbahn mountain station and leads through varied terrain. The flow trail is specially designed to offer a smooth riding experience, with gentle bends and moderate gradients allowing bikers to enjoy a harmonious yet exciting ride.

The trail is ideal for all those who want to enjoy mountain biking in a breathtaking mountain landscape without having to rely on technical challenges or big jumps. It offers a perfect introduction to mountain biking but is also an excellent choice for experienced riders who want to experience the "flow" on the trail. Once you reach the valley, the surrounding restaurants invite you to take a cosy break to round off the tour in a relaxed manner.
